● Pipex px®

Pipex px® has been supplying award winning FRP (Fibre Reinforced Polymer) products to UK and global markets since 1975.

With a long standing reputation for designing innovative high quality products, Pipex px® have a dedicated, highly skilled design team to help with your project from conception to completion.

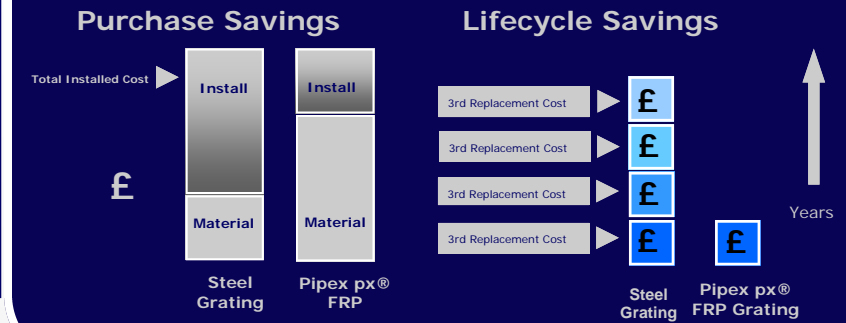

Pipex px® is accredited to BS EN ISO9001, ISO 14001 & OHSAS 18001.

● Pipex px® FRP Advantages:

- Corrosion Resistant
- Non Conductive
- Low Maintenance
- Light Weight
- Cost Effective
- Impact Resistant
- Easy to Install
- Fire Retardant
- Easily Painted

● Cost Considerations:

● Pipex FRP Access Structures

FRP Walkways & Platforms

Designed and built to suit any project specification.

FRP Handrails

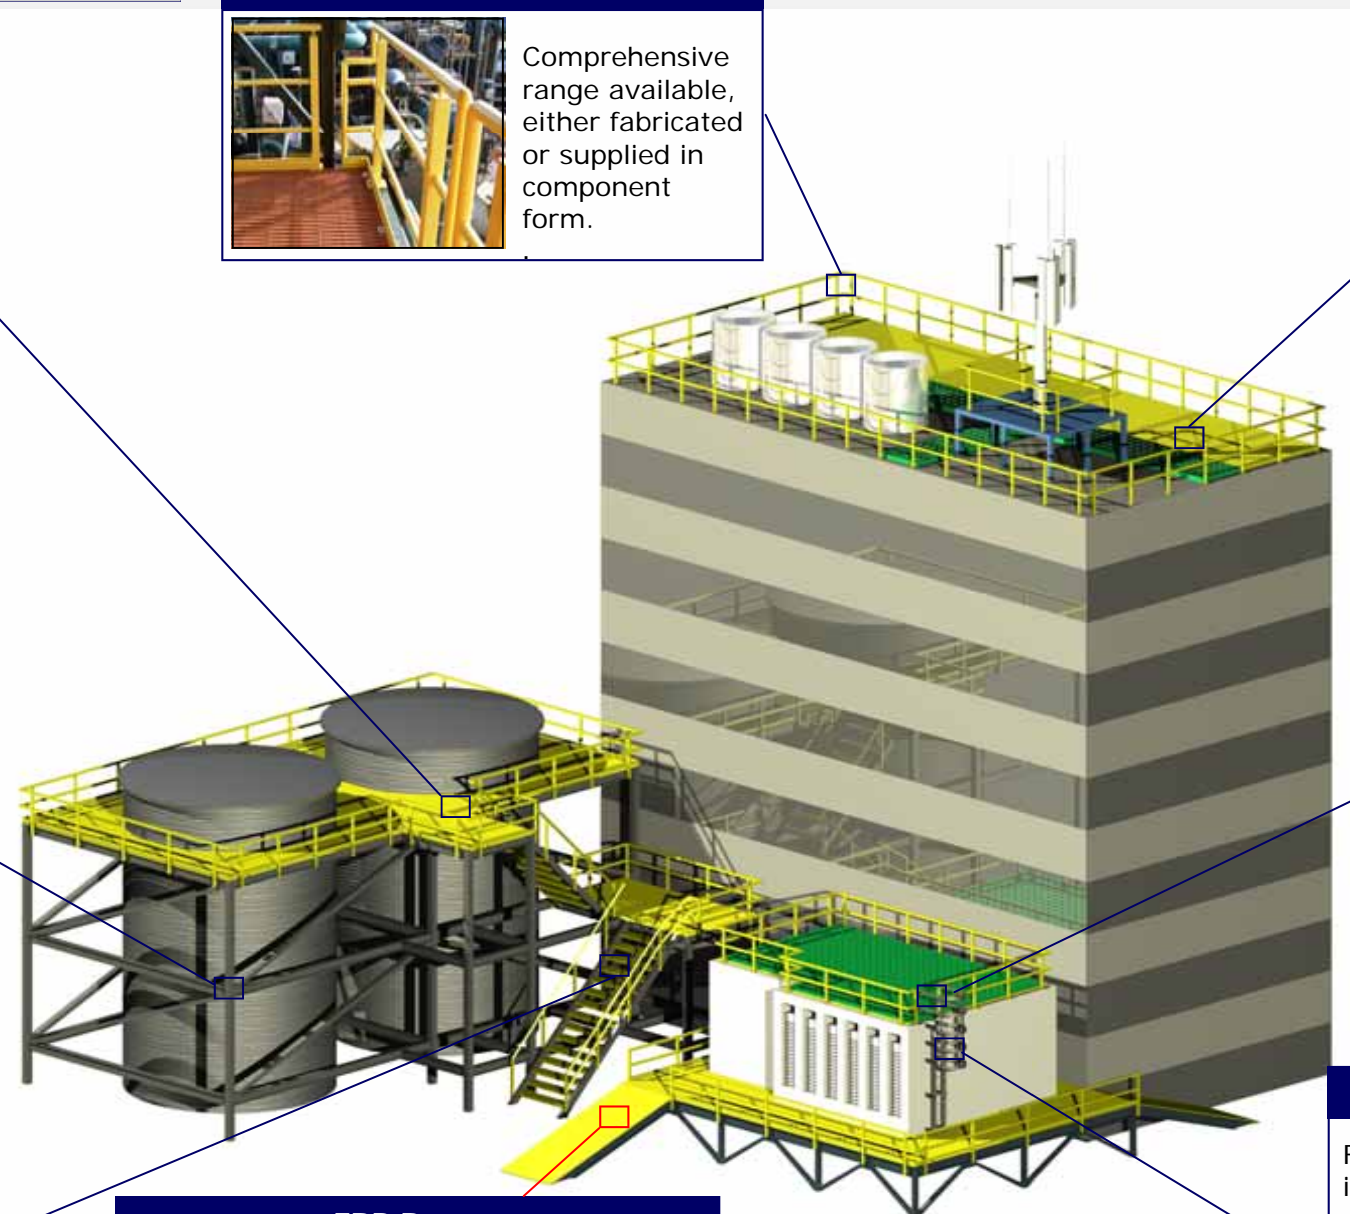

Comprehensive range available, either fabricated or supplied in component form.

FRP Structures

Designed and built to support walkways and equipment.

FRP Staircases

Integrates with walkways & platforms for safe access.

FRP Ramps

Available to suit pedestrian or vehicular loadings.

FRP Grating & Flooring

Moulded & pultruded grating or solid surface flooring suitable for pedestrian or vehicular loadings.

FRP Safety Gates

Available with self closing mechanisms and locks.

FRP Safety Gates

Fabricated to individual project specifications. Safety cages available upon request.

● Pipex px® FRP Skills & Capabilities

Design and Engineering

We offer a dedicated product design and engineering capability:

- Product selection
- Structural design & calculations
- Structural design drawings
- GA & detailed drawings
- Live load testing

Project Management

Each project we undertake is allocated to one of our dedicated award winning project management teams to ensure continuity, and provide "one point of contact" for our customers in the UK and Overseas.

Fabrication

We offer specially equipped workshops and trained personnel.

- Cutting service
- Prefabricated structures delivered flat packed or ready assembled
- Large structure capability
- Machining - 5 Axis CNC milling machining
- Laminating & moulding
- Computer controlled bonding
- Heavy lift capability
- 7 metre thermal cure oven
- 35,000 sq ft of factory space

Installation & On-Site Support

We can provide installation services and on site product support engineers, as well as site surveys and commissioning.
